

You do not need to be a programmer to build software anymore.

Claude Code is an AI agent that writes and runs code for you, right on your own computer. You describe what you want in plain English, and it builds it: a website, a small tool, a script that automates the boring parts of your week.

This book takes you from never having opened a terminal to building and running your own projects. Written for complete beginners, in plain language, with real screenshots at every step. No coding background. Nothing assumed.

If you have ever watched developers conjure things out of thin air and wished you could do that too, start here.

Marco Kotrotsos
Marco Kotrotsos has spent 30 years in IT, now focused entirely on AI. He works hands-on with companies and writes the Autocomplete newsletter. He wrote this book for everyone who was told that building software was not for them.

Claude Code for Everyone Else

A HANDS-ON GUIDE

Claude Code for Everyone Else

The complete beginner's guide to the most powerful coding agent in the world. No experience needed.
